

MATRIX ADHESIVES GROUP OPENS NEW PLANT LOCATION

November 6, 2023 – Matrix Adhesives Group (“Matrix”), a leading North American adhesive and sealant manufacturing and packaging platform, has built a new manufacturing plant outside Columbus, Ohio, in Grove City. The 50,000+ square foot facility includes automated mixing and filling capabilities, with ample room for expansion.

“We are excited to announce the opening of our operations in Grove City. This plant expands our ability to serve our valued customers and represents a new growth mechanism for Matrix Adhesives,” said Dennis Johnson, CEO and President, Matrix Adhesives Group.

Matrix was founded in 2021 and has since acquired five companies to add to their portfolio. This new location was identified based on proximity to its customer base, the current portfolio facilities, and its new headquarters. The plant will be highly automated to provide high quality silicone and hybrid technology to the industrial, consumer and automotive aftermarkets. It will employ 20 employees in the local area to support its mixing, packaging, and shipping operations.

“This new facility and advanced production equipment, when matched with the deep and talented workforce this location provides, gives Matrix greater capacity to better serve our customers, and positions us very well for future expansion of volume and capabilities.” said Mike Toombs, VP Operations, Matrix Adhesives Group.

About Matrix Adhesives Group

Matrix Adhesives Group is a leading adhesive and sealant solutions development partner. We specialize in formulating, filling, blending, and contract packaging for consumer and industrial markets. For more information, visit Matrix Adhesives Group’s website at www.matrixadhesives.com.

About Guy Chemical Company

Founded in 1995, Guy Chemical specializes in developing and formulating high-quality silicone sealants and greases, as well as two-part epoxy adhesives. Guy Chemical is also a dedicated contract packager, offering filling, blister packing, and other types of secondary packaging for the consumer and industrial markets. Our staff has more than two decades of experience in formulating, compounding, raw material procuring, package and art designing, filling, and secondary packaging, and works constantly to ensure the highest levels of quality for our many satisfied customers.
